

多个gestureRecognizer冲突

```
[gr requireGestureRecognizerToFail:gr1]; //gr1识别失败后,在识别gr
```

```
@protocol UIGestureRecognizerDelegate <NSObject>  
- (BOOL)gestureRecognizerShouldBegin:(UIGestureRecognizer *)gestureRecognizer{  
    //GR 是否 响应began  
    return YES; //默认  
    or return NO  
}  
- (BOOL)gestureRecognizer:(UIGestureRecognizer *)gestureRecognizer  
shouldReceiveTouch:(UITouch *)touch{  
    //GR 是否 接收touch  
    return YES; //默认  
    or return NO  
}  
- (BOOL)gestureRecognizer:(UIGestureRecognizer *)gestureRecognizer  
shouldRecognizeSimultaneouslyWithGestureRecognizer:  
(UIGestureRecognizer *)otherGestureRecognizer{  
    //是否 支持多个GR.  
    return NO; //默认  
    or return YES;  
}  
@end
```
